1. Introduction

- This project focuses on analyzing marketing campaign performance across multiple beauty brands
- Evaluates effectiveness using key metrics such as revenue, profit, ROI, conversions, and engagement
- Helps identify high-performing campaigns and areas of improvement.
- Objective is to optimize marketing strategies and maximize overall business returns

Project Overview

- Dataset includes multiple campaign types, platforms, and customer segments
- Data preprocessing and KPI calculations performed using Excel
- Interactive dashboard developed in Tableau for better visualization and analysis
- Analysis covers:
  - Campaign performance by type
  - Customer segment analysis
  - Platform-wise investment and returns
  - Time-based trends of ROI and profitability

KPI Framework

KPIs (Key Performance Indicators) are used to measure campaign success and efficiency

Provide insights into financial performance, customer behavior, and cost effectiveness

Key KPI Categories:

Financial Performance

Campaign Effectiveness

Customer Engagement

Cost & Platform Efficiency

Financial KPIs

Total Revenue

₹8,565 Cr

Total earnings generated from all campaigns

Total Profit

₹5,652 Cr

Profitability after deducting campaign costs

Average ROI

269%

Overall return on marketing investment

Key Insight: Campaigns are highly profitable with strong financial performance. Effective resource utilization is a highlight of the current campaign cycle.

Campaign Performance KPIs

Conversion Rate

~19%–20%

Reflects efficiency of campaigns in converting users

Total Conversions

34M+

Indicates high customer acquisition and engagement

Top Performer

Paid Ads

Generated ~₹1,723 Cr revenue

Other Key Contributors: Email, Social Media, Influencer

Customer Engagement KPIs

Average Engagement Score

~455K–462K

Measures interaction level of customers with campaigns

Engagement Distribution

Working Women
Highest engagement segment

Youth
Strong adoption across demographics

Tier 2 Cities
Emerging growth market

Premium Shoppers
High value customer base

Key Insight: Campaigns are effectively targeting diverse customer segments, driving deep interaction.

Cost & Platform KPIs

Top Investment Platforms

- Email **(~₹1,643M)**
- Instagram **(~₹1,620M)**
- Facebook **(~₹1,608M)**

Customer Acquisition Cost

~₹12.5M

Average across all segments. Indicates high cost efficiency in acquiring new customers.

Key Insight: Balanced spending indicates an optimized budget allocation strategy. The current mix effectively maximizes reach across high-performing platforms while maintaining sustainable acquisition costs.

Trend Analysis

- ROI trend remains stable across most time periods
- One noticeable decline indicates a potential inefficiency or external impact
- Profit trend follows a similar pattern
- Overall, performance remains consistent and sustainable

Key Insights

- Paid Ads and Influencer campaigns are the highest revenue drivers
- Email and Social Media campaigns deliver strong conversion performance
- Conversion rates are consistent across all campaign types
- Customer engagement is evenly distributed across segments
- Investment is concentrated on major platforms, ensuring strong reach

Business Impact (IF)

- High ROI indicates strong return on investment and business growth potential
- Stable conversion rates ensure consistent customer acquisition
- Balanced engagement reduces dependency on specific customer segments
- Identification of top-performing channels enables better budget allocation
- Insights help in reducing unnecessary spending and improving efficiency
- Supports strategic, data-driven decision making

Recommendations

Increase Investment: High-performing campaigns like Paid Ads and Influencer marketing.

Optimize ROI: Improve efficiency during low ROI periods.

Channel Focus: Prioritize Email and Social Media for higher conversions.

Targeting Strategies: Enhance audience targeting to improve engagement levels.

Diversification: Spread platform usage to minimize risk and dependency.

Summary

Strong Performance

Overall campaign performance is strong across all brands.

Profitability

High ROI and profitability achieved through optimized channel management.

Balanced Contribution

Balanced contribution from different campaign types and platforms.

Optimization Path

Data insights provide clear direction for optimization and growth.

Conclusion

- Marketing performance can be significantly improved using data analysis
- KPIs play a critical role in measuring and optimizing campaign effectiveness
- Excel and Tableau enable efficient analysis and visualization
- Project demonstrates practical application of analytics in real-world business scenarios

THANK YOU
